Maternity & Mother-Baby Program
14-bed staff-secure facility
Ages 12-18
Dependent and Delinquent**

~ Placement Success Checklist ~

Individualized treatment for pregnant and/or parenting clients exhibiting impairments in several areas of daily life including social, educational, family, and psychological functioning.

Medical and mental health treatment provided by a team of professionals, including a child psychiatrist, clinical psychologist, on-site registered nurses, licensed clinical social workers, a nutritionist and mental health therapists to promote the healthy development of both mother and child.

Individual, peer group, and family counseling provided by Master's level therapists to increase ability to form and maintain relationships, parent appropriately, improve decision making skills and seek both formal and informal supports.

Aggression Replacement Training® (ART) curriculum implemented, including groups such as skillstreaming, anger management and moral reasoning.

Group therapy including cultural sensitivity, victim awareness, conflict resolution and victim/offender mediation provide for treatment according to the BARJ principles.

Internal discipline and supervision-of-self encouraged by a highly structured system of privileges and consequences, placing emphasis on responsibility, personal accountability and internalization of self-discipline.

On-grounds educational facility, including specialized education, GED preparation and individual tutors.

Family treatment includes weekly parent group sessions, regular parent/child counseling, family visitation, fatherhood classes and referral/support services.

Work Experience Program (75% of wages earned is applied toward restitution owed) and community service opportunities are provided for clients in accordance with BARJ principles.

Drug and alcohol education utilizes the "disease concept" and incorporates individual and group interventions as well as external community supports.

Education and experience in basic living skills includes parenting, cooking, cleaning, budget management, basic home and lawn maintenance, laundry, personal hygiene, job search, interview skills and use of community transportation and resources.

Community based resources such as sexual victimization/offender treatment, nutritional education, grief/loss counseling and career development.

Recreational therapy, including group activities and development of constructive interests.

Transitional planning and aftercare services include quality follow-up during the 1st, 3rd, 6th, and 12th month after graduation and referrals for WRAParound therapy and medication management upon treatment completion.
